

anyway, so you don't need to spend too much time on choosing starting dates.

- Then just add a list of test tools that you want to use (MS Excel, MS Word, issue tool) and your plan is ready!
- If you are still left with some chapters in the template, just delete them. The things I subscribed above are all you need.
- Send the plan for approval to the project manager. You are expected to work for about three weeks on creating this test plan.

What did you just read?

Did you recognize parts of the stories above? Could you agree with them or even some parts of them? Please not that those parts will be the areas where you might want to study some more on testing. Maybe a colleague is telling some kind of story as you've read in this article. Run away or help him or her, because this kind of stuff is really killing our professionalism.

The message is: Keep critical of your own work and professionalism. Of course, everyone has a bad day or a project that is not going well. The main concern of the tester is to stay sharp and deliver valuable information about the quality to the stakeholders.

Have you got your own story (own experiences and learning) or did you hear about something comparable? Please write me at
